Sagnik Chakraborty

Front-End Developer, Deep Learning Enthusiast

sc26220@it.jgec.ac.in | sagnikhub.me | linkedin.com/in/eccentricexplorer | Siliguri, West Bengal, India

SUMMARY

Results-driven developer with expertise in Web Development (Frontend focused), UI/UX Design, Brand Identity Creation, and AI/ML solutions. I'm proficient in Python, JavaScript, MERN, and Machine Learning frameworks like TensorFlow and Keras with a strong foundation in programming, data structures (C and Java), and cloud computing (GCP).

EDUCATION

BTech in Information Technology

SGPA5: 9.0

Jalpaiguri Government Engineering College

Jalpaiguri, WB | 09/2022 - 07/2026

Senior Secondary Schooling

% : 95%

Delhi Public School

Siliguri, WB | 04/2020 - 07/2022

- I was a Science (Physics, Mathematics, Chemistry, Computer Science, Economics) student in my senior secondary years

EXPERIENCE

Founder and Content Head

06/2024 - Present

EduLinkUp

Remote

www.edulinkup.dev

- Building EduLinkUp as a student-first learning ecosystem focused on skill development, internships, and community-driven growth.
- Leading content strategy while actively contributing across product development, platform design, partnerships, and program execution to create scalable learning opportunities for students.

Google Student Ambassador

09/2025 - Present

Google

Remote

- Leading AI-driven initiatives on campus to promote awareness and innovation around Google Gemini. Organizing hands-on AI and Gemini workshops, demos, and events to drive AI adoption. Collaborating with college fests and student communities, sharing insights and feedback to enhance Gemini's campus impact.

Front-End Web Developer Intern

07/2025 - 10/2025

Unified Mentor

Remote

- Worked on the development of a diverse range of beginner, intermediate and advanced level Web Development projects.

Python Developer Intern

08/2025 - 09/2025

Elevate Labs

Remote

- Worked on the development of a diverse range of beginner, intermediate and advanced level Python projects.

Educational Content and SDE Intern

06/2024 - 08/2024

JGEC

Jalpaiguri, WB

- Contributed to researching, collecting, and processing content for the Computer Science syllabus chapters. Designed and integrated illustrations, fact boxes, and QR codes to enhance interactivity. Developed the corresponding fullstack using Wix and animated learning materials using generative AI, and creating engaging quizzes.

RESEARCH & PUBLICATIONS

DeepOptinet - An Optimised CNN Model with Wavelet Filtering and SE-Blocks for Robust Iris and Fingerprint Unimodal Authentication

2025

12th International Conference on Microelectronics, Circuits and Systems (MICRO 2025)

- An optimised CNN model with Wavelet Filtering and SE-Blocks for segmentation-free robust iris and fingerprint unimodal authentication.
- Test and Prediction Accuracies were 92.4% and 95.83% for Iris, 99% and 100% for Fingerprint, without any augmentation.

Implementing Secure BLE Signal Transmission through Antenna Design Techniques in Wearable IoT Devices

2025

Handbook of Security, Quantum Computing and Internet of Things (IoT) - CRC Press (Taylor & Francis Group)

- Cross-layer security framework for wearable IoT
- Reduces signal leakage risk by up to 40%

CERTIFICATIONS

- **Machine Learning Specialization - Stanford**
- **Python for AI and Development - IBM**
- **Cloud, Node, Express, React, JS, Git - IBM**

SKILLS

Software Development

C | Python | OpenCV | PIL | R | SQL | HTML5 | CSS3 | JavaScript | GIT | ReactJS | Vite | NodeJS | ExpressJS | MongoDB | NextJS

Artificial Intelligence

Python | MatPlotLib | NumPy | Scikit-learn | Keras | Pandas | TensorFlow

PROJECTS

TalkHeal

04/2023 - Present

Using Python and Streamlit

- A compassionate AI-based mental health assistant, 24/7 support with smart chat history, mood slider and AI-based coping tips, mental health resources and helplines

SaralSeva

07/2025 - Present

Using MERN Stack

- A 3-tier digital governance platform which enables 24/7 access to government services, tracks applications with unique IDs, automates workflows, manages schemes, and ensures grievance redressal for citizens, employees, and admins.

SpamIyser

06/2025 - Present

Using Python, Streamlit, HuggingFace Transformers

- A real-time SMS spam classifier with LLMs (DistilBERT, BERT, RoBERTa, ALBERT) using Python, Streamlit, Transformers, Hugging Face, Pandas, Plotly, Regex for fast, visual, feature-rich detection.

BharatShaala

07/2025 - Present

Using React (CRA), Flask, SQLite

- A Culture-first marketplace for Indian markets, artisans, authentic products, immersive UI with animations; market discovery; category-first shopping, vendor routes scaffolded; SEO, performance, accessibility focused

EVENTS & OPEN SOURCE

Top 10 Project Admin - GSSoC'25
Ranked among the top 10 Project Admins out of hundreds in GirlScript Summer of Code 2025, demonstrating exceptional project management and mentorship.

Supercontributor - Hacktoberfest
Ranked in the first 10,000 contributors among ~100,000 global participants in Hacktoberfest. Also served as a Project Admin, mentoring contributors and managing repositories.

Winner - TechnoVision 2k23
Won TechnoVision 2k23, a competitive technical event showcasing innovation and technical excellence.

Open Source Leadership & Contributions
Active participation, contributions, mentorship and leadership across multiple open source programs including Apertre, SWoC, JWoC, KWoC, WoCS, OSCI, and OSCG, driving community growth and technical excellence.

VOLUNTEER

Organising Coordinator

05/2025

Micro2025 - 12th International Conference on Microelectronics, Circuits and Systems

Organising Coordinator

03/2025

NCRTST25 - National Conference on Recent Trends in Science and Technologies

Campus Ambassador

01/2023 - 07/2023

DevTown

Fundraiser Intern

01/2023 - 03/2023

Tare Zameen Foundation
