Sagnik Chakraborty

Front-End Developer, Deep Learning Enthusiast

+91-9883465825 sc2620@it.jgec.ac.in eccentriccoder01.github.io/Me linkedin.com/in/eccentricexplorer
Siliguri, West Bengal, India

SUMMARY

Results-driven developer with expertise in Web Development (Front-end focused), UI/UX Design, Brand Identity Creation, and AI/ML solutions. Proficient in Python, JavaScript, ReactJS, NodeJS, and Machine Learning frameworks like TensorFlow and Keras. Strong foundation in programming, data structures, and cloud computing. Building impactful digital products with a focus on functionality, visual appeal, and user experience.

EDUCATION

BTech in Information Technology

Jalpaiguri Government Engineering College

09/2022 - 07/2026 Jalpaiguri, WB

SGPA5

9.0 / 10.0

Senior Secondary Schooling

Delhi Public School

04/2020 - 06/2022 Siliguri, WB

%

95 / 100

- I was a Science (Physics, Mathematics, Chemistry, Computer Science, Economics) student in my senior secondary years

EXPERIENCE

Educational Content and Software Developer Intern

Jalpaiguri Government Engineering College

06/2024 - 08/2024 Jalpaiguri, WB

- I contributed to researching, collecting, and processing content for the Computer Science syllabus chapters.
- Designed and integrated illustrations, fact boxes, and QR codes to enhance interactivity.
- Developed the corresponding website using Wix and animated learning materials using generative AI, and creating engaging quizzes.

Project Manager and Mentor

Resourcio Community

01/2024 - 01/2024 Remote

I was assigned the roles of a mentor and project manager for Apertre 2024, a dynamic and electrifying 15-day long open-source event, powered by Resourcio Community and GDSC AOT.

Web Developer Intern

CodSoft

07/2023 - 08/2023 Remote

Worked on the development of a diverse range of beginner and intermediate-level web development projects, including a personal portfolio website.

VOLUNTEERING

Organising Coordinator - 12th International Conference on Microelectronics Circuits and Systems

Jalpaiguri Government Engineering College

Fundraising Intern

Tare Zameen Foundation

SKILLS

Software Development

C Python OpenCV PIL R

SQL HTML5 CSS3 JavaScript

GIT ReactJS NodeJS ExpressJS

MongoDB

Artificial Intelligence

Python MatPlotLib NumPy

Scikit-learn Keras Pandas

TensorFlow

PROJECTS

DeepOptinet

01/2024 - Present

kaggle.com/code/mreccentric/deepoptinet-parallel-unimodal-recognition

In Python, using TensorFlow, Keras, Pandas and MatPlotLib.

- An optimised CNN model with Wavelet Filtering and SE-Blocks for segmentation-free robust iris and fingerprint unimodal authentication.
- Test and Prediction Accuracies were 92.4% and 95.83% for Iris, 99.% and 100% for Fingerprint, without any augmentation.

VoyageVista

10/2023 - 01/2024

voyagevista.vercel.app

Using ReactJS, NodeJS, ExpressJS, MongoDB, HTML5, Bootstrap and Tailwind CSS

- A demonstrative international travel-booking website which vows to facilitate international journeys, enabling seamless bookings without the weight of extra charges

CERTIFICATIONS

Machine Learning Specialisation - Stanford

Python for AI and Development - IBM

Cloud, Node, Express, React, JS, Git - IBM
